“Whatever the mind of man can conceive and believe, it can achieve.”

## Summary

I am an enthusiastic software engineer student. With over two years of valuable experience in the IT industry, I've actively participated in the development, testing, deployment and maintenance of features for several software projects aimed at solving common real-world problems. I thrive in collaborative team settings where the exchange of knowledge and teamwork contribute to collective progress, ultimately benefiting the company and the customers. My passion for continuous learning drives me to enhance my skills, both on a personal and professional level. I'm eager to delve into emerging technologies and seize opportunities for personal and career growth.

## Education

### Schmalkalden university of applied sciences

MASTER EXCHANGE PROGRAM COMPUTER SCIENCE

Schmalkalden, Germany

Sep. 2022 - Sep. 2023

### Tek-up(Private College of Engineering and Technology)

SOFTWARE ENGINEERING DEGREE

Ariana, Tunisia

Sep. 2020 - April. 2023

## Certifications and Awards

2023 **Coursera**, IBM certification : Continuous integration and continuous delivery (CI/CD) from IBM

2023 **Coursera**, Continuous Delivery and DevOps from university of virginia

2023 **British Council**, British Council English certificate

2022 **Google Digital Academy**, Google Analytics Certification

2019 **Finalist**, hackathon “HACK FOR THE FUTURE”

Tunis city, Tunisia

## Work Experiences

### Bestrade Company

FRONTEND DEVELOPER FREELANCER

Ariana, Tunisia

Jun. 2021 - Jan. 2022

- Create, test, debug, document, and implement new features for a collaborative platform dedicated to international trade professionals.
- Work directly with the Product Manager, and suggest new features and improvements to current ones.
- Maintain and add new features to our UI component Library and Modules.
- Using devops best practices and automate the integration, the build and testing through CI/CD pipelines
- **Languages:** HTML, Javascript, Typescript, CSS
- **Technologies/ keywords :** React js, Redux, Nextjs, rxjs, MVC, Tailwindcss, Nodejs, mongodb, Git, Jasmine, Github, Microservices, Kubernetes, Jenkins, Github actions, Docker

### Mediterranean Store Company

FULLSTACK DEVELOPER FREELANCER

Ariana, Tunisia

Dec. 2019 - dec. 2020

- Create, build, test, and implement and deploy new features for a responsive e-commerce site for the sale of organic and artisanal products.
- Support in Creating, building and integrating API to access the application data.
- Manipulate and control data to meet necessary conditions throughout the entire data lifecycle.
- Set, plan and implement social media and communication campaigns and strategies.
- **Languages:** HTML, Javascript, Typescript, CSS, PHP
- **Technologies/ keywords :** Vanillajs, bootstrap, Mysql, Karma, Git, Gitlab, bash, illustrator, Marketing, UI/UX

### IT Consult and Integration

INTERN SOFTWARE ENGINEER

Ben Arous, Tunisia

Dec. 2018 - May. 2019

- Create, build and test features of an android application designed to protect users from traffic risks.
- Collect data and construct a dataset related to previous road accidents.
- Train and build a machine learning model to estimate the probability of user's accident rate based on real-time data.
- Transform the machine learning model into an API and Integrate it with the android application.
- Implementing Push Notifications With Google Cloud Messaging
- **Languages:** Java, Python
- **Technologies/ keywords :** Android studio, Tensorflow, Pandas, Flask, nodeJs, Socket.io, mongoDB, expressJS, Firebase.

## Skills

---

**Programming Languages**, C/C++, Java, Javascript, Python, PHP, CSS, HTML

**Frameworks**, Reactjs, Nodejs, Angular, Django, symphony, Flask, Tensorflow, pandas, Nextjs, Bootstrap, Tailwindcss

**Cloud Services**, Amazon web services, Microsoft Azure, Google Cloud Platform

**Test and build Tools**, Jasmine, Karma, nose, ESLint, pylint, Flake8, selenium, Cucumber, TestNg, Buildah, Maven, Gradle

**Architectures**, MVC, MVVM, MVP

**Integration, Automation and cloud tools**, Devops, Jenkins, Git, Github, Gitlab, CircleCI, Github actions, Tekton, Kubernetes, Ansible, Terraform, Docker, Docker Hub, Tekton Hub, Bash scripting, Vagrant

**Monitoring and management tools**, Jira, Kibana, Grafana, Confluence, Trello

**Operating systems**, Linux, CentOS, Ubuntu, Android, Windows

**Software Methodologies**, Agile Scrum, Cycle V, Waterfall

**Network and communication protocols**, HTTP, FTP, DNS, SSH, SMTP, TCP/IP, UDP Websockets, VoIP

## Languages

---

**English**, Fluent (B2 : British council English certificate)

**French**, Fluent (TCF C1)

**German**, Basic

**Arabic**, Native
